To Whom It May Concern:

Since establishment of 2AM Group, Baxter Enterprises has had the opportunity to work with the Quality Inspection Team. They have effectively contained several issues for us that allowed us to close customer concerns. These containment activities have included parts that are eventually supplied to Cadillac SRX and the Chevrolet Corvette.

The 2AM Group has consistently provided trained Associates off-site to fulfill our needs. These Associates were found to be knowledgeable, eager to resolve the issues, provided timely reports on a daily basis and were flexible from the start to finish of the project. We found that these Associates were familiar with GM and other OEM products and it is obvious that 2AM Group had provided CS2 containment on GM products supplied to them in the past.

Through Baxter Enterprises developing relationship with 2AM Group, consideration is being put into planning which would involve 2AM.

Please do not hesitate to contact me if additional information is needed.

Sincerely,
