To Whom It May Concern:

Since the establishment of LSP Automotive Systems LLC, we have had the opportunity to work with 2AM Group on numerous projects. 2AM was instrumental in assisting our parent company, Laple AG, in locating LSP Automotive in Union County. Artie Perry and his staff worked with our team to determine location, negotiate land pricing with Union County officials and organize state incentives for our company.

Since the start-up of LSP Automotive Systems, 2AM Group has provided highly qualified, experienced technicians to assist in numerous metal finishing projects. We have also had the opportunity to work with the Inspection Team in providing services for inspection, sort, and rework of various projects. These activities have included parts that are eventually supplied to the BMW X6 project.

Currently, the Engineering staff is working with our team in developing a Quality Management System for TS 16949. In the process, these Associates have assisted in many aspects of implementing quality assurance systems throughout our facility.

2AM associates were found to be knowledgeable of the task, eager to resolve the issue(s), flexible from the start to finish of the project and provided timely reports on a daily basis. In addition, it is evident that they are familiar with BMW quality requirements.

2AM Group has conducted themselves in a very professional manner and we have found that they operate with the highest level of integrity. LSP Automotive will continue to develop our relationship with 2AM Group.

Please do not hesitate to contact me if you have any questions or additional information is needed.

Sincerely,
